

# CLASSES IN OUR SCHOOL

We would like to introduce the classes and the classrooms in our school.

**CLASSES** Our school is a primary and secondary grammar school. Our students are 6-18 years of age. At primary level, we have 8 classes, where students are taught from grade one through grade eight. At the secondary level we have 7 classes. Except for the 9<sup>th</sup> grade, there are two classes in every grade here. The numbers of students varies in the different classes. We have bigger classes with 36 students, and smaller ones with only 19.

**CLASSROOMS** There are different classrooms here which are well-equipped. We have got a good opportunity for learning because there are specialized rooms for Chemistry, Biology and Physics. To tell the truth, the cohesive force is essential among students of different classes. Programmes and activities are organized regularly and they converge the classes together. You can make friends easily and get to know new students as well. The atmosphere during the programmes is good. The students are fond of doing different activities.

The most famous programme is the '*Fecskeavató*', which means '*swallows' inauguration*', the ''swallows'' are the first year students.

Secondly, the *Christmas Show*, when we introduce the birth of Jesus Christ in a role play.

Last year we organized a new school programme which became traditional. It is called: '*School prom*'. We have dinner together, then we dance and finally, the queen and the king are chosen.

Last but not least, another favoured activity is the so called '*Linguistic Afternoon*'. The classes show us their language skills by reciting poems, singing songs, role playing and introducing presentations. It is enjoyable and useful.

Altogether, we have a lot of programmes, we really enjoy them and we try to enrich them as well.

# OUR CLASS

In our class there is a really nice atmosphere among the twenty-two students. We are a good bunch and we like spending our time together. The students in our class get on well with each other. Most of the time, we can rely on and appreciate each other because everybody is helpful.

Lots of free-time programmes are organized, for example we often go to the cinema or to a restaurant together, or play bowling. It depends on our mood and business.

Altogether it is a good group with friendly students and an enjoyable atmosphere.
